

Pine Ridge: A Haven for Equestrians and Nature Enthusiasts

Riding and Hiking trails right here at home!

Pine Ridge is a unique equestrian community, and was meticulously planned in 1972 by the Mackle brothers. Designed to cater exclusively to horse owners and nature enthusiasts, Pine Ridge offers a one-of-a-kind living experience.

Deeded horse trails and wooded terrain create a picturesque and inviting landscape that captivates riders and nature lovers alike. These visually appealing, spacious properties attract new homeowners while maintaining the community's premium property values.

Pine Ridge equestrians enjoy the camaraderie of living with fellow horse lovers. They have access to an array of amazing amenities, including 28-miles of horseback trails conveniently accessible from many homes. A centrally located Equestrian Recreation Center provides a community barn, multiple arenas, and ample parking for residents who trailer in to attend events, use the arenas, or explore the trails. The interconnected Pine Ridge trail system seamlessly circles back to the Equestrian Center.

Beyond equestrians, non-equestrians also share many of the same benefits. The extensive trail system is accessible to walkers, offering a tranquil escape from the hustle and bustle of everyday life.

Since motorized vehicles are prohibited, it's a safe haven for exercise, birdwatching, and photography of flora and fauna. The abundance of live oaks and pines provides picturesque, shaded settings, allowing residents to connect with nature.
