

Tod Cloud – Candidate for Florida State Representative, District 23

- 1) Campaign contributions have too much power in politics. We need a fairer system that gives every candidate an equal chance to compete and ends the outsized influence of PACs and Super PACs.
- 2) We must protect our water supplies by stopping herbicide spraying in our waterways by the F.W.C. and limiting ground spraying by power companies to control vegetation. We should also stop selling our natural water resources to bottling companies.
- 3) Equestrian safety matters to our entire community. I will consult with residents and county officials to create practical policies that make this area safer for everyone.
- 4) Homeowners insurance rates must come down. I will pursue creative, practical solutions, including making Citizens Insurance a first-choice option instead of a last resort and exploring ways for loan companies to self-insure.
- 5) I would work to reduce taxes properly but not cut them in ways that harm local revenues. We will have to see how the voters feel about HJR1. The problem is we will have to rob Peter to pay Paul.
- 6) I will help with the essential services by finding state and federal grants.
- 7) I will work with county leaders and the medical community to ensure senior care keeps pace with our growing needs.
- 8) I will make sure the county government is doing its part to keep up with infrastructure needed to conserve our nature coast. Also again, stop the spraying of herbicides.
- 9) I would encourage roundabouts for two lane intersections only. This will help keep traffic moving safely.
- 10) Stop any further toll road.
- 11) I see myself as voice for the people. We need elected officials with a heart for the people and not for big money donors.
