

# With Timberline® High Definition® Shingles, You Get:

- **Incredible Value.** You can increase the value of your home by an average of 5% with a new Timberline® roof!†
- **Exceptional Protection.** Professional installers have long preferred the rugged, dependable performance that only a Timberline® roof can offer
- **Remarkable Style.** The architectural look that's ideal for all homes—from traditional to contemporary
- **High Performance.** Designed with Advanced Protection® Shingle Technology, which provides excellent protection for your home

†2013 National Association of REALTORS® survey commissioned by GAF of REALTOR® Appraisers and Non-Appraisers in the U.S.; response based on REALTOR® Appraisers that have had professional experience buying or selling a home with Timberline® Shingles in the three years preceding the survey and felt they could provide an estimated value increase for a home with a Timberline® roof as compared to a home with a basic three-tab shingle roof.

*Note: It is difficult to reproduce the color clarity and actual color blends of these products. Before selecting your color, please ask to see several full-size shingles.*

**Exceptional Colors.** The striking, enhanced color blends of American Harvest® Shingles embody the beauty of America's heartland

**Uncommon Appeal.** American Harvest® Shingles complement your home's exterior color scheme — so your roof will be the talk of the neighborhood!

**Great Value.** All the modern architectural style and dimensionality you want — at a price you can afford

**High Performance.** Designed with Advanced Protection® Shingle Technology, which provides excellent protection for your home

# Timeline

\*See *GAF Shingles & Accessories Ltd v. Managor* for accurate coverage and resolutions. The word "Lifetime" refers to the length of cover you're provided by a *GAF Shingles & Accessories Ltd*. Warranty and means it includes the original individual ownership of a single, not fully detached, residence for the second owner(s). In certain circumstances, wants the property where the shingles and accessories are installed. For owner's structures not meeting the above criteria, Lifetime coverage is not applicable. Lifetime Ltd. Warranty on accessories requires the use of at least three qualifying GAF accessories and the use of Lifetime shingles.

## HERITAGE® Premium

LAMINATED ASPHALT SHINGLES

Express your style and showcase the beauty of your home with the rustic hues and bold textures of Heritage® Series Laminated Asphalt Shingles. These shingles are available with a Limited Lifetime Warranty. See TAMKO's Limited Lifetime Warranty and Arbitration Agreement for complete details.

See how the Heritage Series can enrich your home's beauty.

Craft a roof influenced by the magnitude of the Rocky Mountains or the tranquility of the Redwood Forest. America's Natural Colors feature vibrant tones and intense warmth inspired by our country's natural elegance to help you bring nature home.

Emphasize your style with the vivid shades of Classic Colors. Choose from a selection of charming greys, elegant reds and earth tones to create a roof that complements your home's unique style.

SHINGLES BEGIN TO AGE AS SOON AS THEY ARE EXPOSED TO NATURE. BUILDINGS EXPERIENCE AGING FACTORS DIFFERENTLY, SO IT IS DIFFICULT TO PREDICT HOW LONG BUILDING PRODUCTS WILL LAST. THAT'S WHY TAMKO PROVIDES A LIMITED WARRANTY FOR MANY PRODUCTS, THAT INCLUDES A BINDING ARBITRATION CLAUSE AND OTHER TERMS AND CONDITIONS WHICH ARE INCORPORATED HEREIN BY REFERENCE. YOU MAY OBTAIN A COPY OF THE LIMITED WARRANTY AT [TAMKO.COM](http://TAMKO.COM) OR BY CALLING 1-800-641-4691.

## PROFILE GUIDE

### HIDDEN SCREWS

#### GULFLOK™

An integrated screw flange makes this classic snap-lock system perfect for residential and light commercial applications.

#### GULFSEAM™

A 3/4" high rib offers architectural distinction on this snap-lock system.

#### MEGALOC™

With an ultra-strong 2" rib height, this mechanically-seamed system can be installed over decking or steel framing.

#### VERSALOC™

Available in a variety of metal types and in a 1 5/8" height, this versatile, mechanically-seamed panel is perfect for many commercial and architectural applications.

### EXPOSED SCREWS

#### GULFRIB™

Durability, strength and ease of installation make this exposed fastener panel a top choice for many residential and agricultural applications.

#### 5VCRIMP™

Get that "traditional" look of metal roofing from yesteryear with this classic exposed fastener roofing system.

#### GULFPBR™

Strength and durability make this exposed fastener panel a top choice for many commercial and residential applications.

#### GULFWAVE™

Ride the wave of architectural distinction with this 3/4" high rolling rib exposed fastener panel.

## Hail Impact Tested Roofing

All Boral Steel panels provide Class 4 Hail Impact Resistant rated performance<sup>1</sup>, the best rating available for roofing products. Our material is warranted for hail up to 2-1/2" inches in diameter and winds up to 120 mph<sup>2</sup>, helping protect your home while adding peace of mind. According to an April 2015 analysis by State Farm, hail and wind damage cost the insurer and its policy holders more than \$2.4 billion in 2014<sup>3</sup>.

<sup>1</sup>Refer to the Hail testing under Resources on [www.BoralRoof.com](http://www.BoralRoof.com)

<sup>2</sup>Refer to the Warranty section at [www.BoralRoof.com](http://www.BoralRoof.com) for details

## Beautifully Efficient

Whatever the style, color or finish of your current roof, a Boral Steel™ Stone Coated roof can further enhance the appearance of your home. Whether you want the look of shingle, clay tile, cedar shake or slate, you can select a Boral Steel roof that will highlight the beauty and increase the efficiency of your home. It will look beautiful for decades to come and requires little to no maintenance to provide a lasting improvement to your home's curb appeal.

Asphalt Shingle

**147°**

attic temperature\*

# Why Steel?

Direct-to-Deck  
Stone-Coated  
Roofing System

89°

Attic Temperature<sup>1</sup>

PINE-CREST | Barclay

## Energy-Efficient

Attic temperatures measured using identical heat sources simulating the sun's radiation, comparing Boral Steel Stone Coated Roof System with Direct-to-Deck installation and Above Sheathing Ventilation (ASV) to a common asphalt shingle roof. The result is less heat in the attic and lower energy bills.

<sup>1</sup>Attic Heat Transfer test available at [www.BoralRoof.com](http://www.BoralRoof.com) see resources section for details.

## Boral Steel™ Cool Roof System

These components provide energy efficiency

Boral Steel™ Stone Coated Panel

Shown in PINE-CREST Shake Charcoal

Boral MetalSeal Underlayment

## Above-Sheathing Ventilation (ASV)

Hot air always rises and creates a natural convection effect. This allows the heated air to be exhausted through ventilation, which causes a continuous airflow across the roof deck. The result is a cooler attic and living space in the home.

No matter the install method, direct-to-deck or EBS battens, a Boral Steel™ Stone Coated roof with ASV can help provide energy savings compared to asphalt shingles.

The Oak Ridge National Laboratory (ORNL) conducted a 12-month study on the effects of high IR pigments vs. metal roofs installed with an airspace. The study showed that EBS or ASV can reduce heat flow into a building by nearly 30%. This can lead to an increase in year-round energy efficiency by reducing heat gains during the summer and heat losses during the winter. These dramatic results prove Boral's ASV is just as important to achieving energy efficiency as reflective roofs.

STONE COATED ROOFING

## ABOUT BORAL ROOFING

Boral Roofing LLC is a subsidiary of Boral USA and is the country's largest premium provider of complete roofing and re-roofing solutions for architects as well as commercial and residential builders. Boral Roofing operates manufacturing plants throughout the US.

## ABOUT BORAL NORTH AMERICA

Headquartered in Roswell, Georgia, Boral North America is a leader in key construction materials and building products markets with operations across the USA, Canada and Mexico. In 2017 Boral acquired I leadwaters Incorporated, expanding Boral's product offering and manufacturing and distribution footprint across North America. In construction materials, Boral has a national footprint and industry-leading position in the processing and distribution of fly ash – a by-product of coal combustion.

In building products, Boral manufactures and supplies cladding, roof tiles, windows and other light building products for residential and commercial markets nationally. Boral's manufactured stone veneer includes leading brands Cultured Stone<sup>®</sup> by Boral<sup>®</sup>, Boral Versella Stone<sup>®</sup>, Eldorado Stone<sup>®</sup>, Dutch Quality Stone and StoneCraft. Boral's light building products portfolio includes Boral Tru-Exterior<sup>®</sup> Siding & Trim – a pioneer of the innovative poly-ash category of exterior building products – as well as shutters, gable vents, mounting blocks and tool systems. In roofing, Boral is a leading manufacturer of clay and concrete roof tiles, and also produces composite polymer and stone coated metal roof tiles.

Boral also has a 50% share of the Meridian Brick joint venture, a leading clay and concrete brick manufacturer which was formed with Forterra Brick in 2016.

#### NATURAL PROTECTION

Attic temperatures measured using identical heat sources simulating the sun's radiation comparing standard Boral concrete roof tile to a common asphalt shingle. The result is less heat in the attic and lower energy bills.

A close-up photograph of water pouring over a rough, textured surface, possibly concrete or stone. The water is captured in motion, creating a blurred, dynamic effect. The background is dark and out of focus. The text "Material Matters." is overlaid in a white, serif font.

Material  
Matters.

### **BEAUTY MATTERS**

Our concrete tiles have texture and substance, creating a true multidimensional look for your roof. Their natural colorways harmonize easily with other exterior building elements.

### **DURABILITY MATTERS**

Boral engineered tile is specifically designed for new build and reroof, helping provide Floridians protection from the elements.

### **VALUE MATTERS**

Boral stands behind the quality of our roof tile with a Fully Transferable, Non-Prorated Limited Lifetime Warranty.

### **SUSTAINABILITY MATTERS**

Boral roof tile is locally made and sourced in Florida since 1958.

# Color Matters.

As the market leader, we strive to enhance the curb appeal of your home. We continuously develop new colors to harmonize with the shifting architectural trends in Florida. We take pride in the color quality and blending we provide.

# STYLES

Florida Boral concrete roof tile easily harmonizes with all three dominant architectural styles.

## HIGH & MEDIUM TILE PROFILE COLLECTIONS

### Barcelona 900

This modern interpretation of old world Spanish design creates a distinctive mission tile appearance.

P. 17

### Boosted Barcelona Caps

Available installation application of Barcelona 900 which creates the appearance of an authentic mortar-boosted tile.

P. 25

### Villa 900

Emulates beautiful Mediterranean styles found in Italy and Southern France.

P. 27

## LOW PROFILE COLLECTIONS

### Saxony® 900 Slate

Beautiful design representative of styles found in England, Northern Europe and the US Eastern Seaboard. Versatile enough to accentuate any architectural style.

P. 33

#### DESIGNER PRODUCT

### Saxony® 900 Shake

Captures rustic beauty of hand-hewn shakes. Ideal for French Country, Victorian Craftsman or Cottage architectural styling.

P. 39

#### DESIGNER PRODUCT

### Saxony® 900 Split Shake

Design features random patterns of coarse and smooth textures and faithfully mimics the appearance of a natural cedar shake roof.

P. 41

#### DESIGNER PRODUCT

### Madera® 900

Madera 900 is the most affordable, authentic replication of a hand-split cedar shake roof available.

P. 43

# BoralRoof.com - Imagine the Possibilities

## Visualize

Picture your new roof with Boral Roofing's Inspiration house photo gallery on our website.

## Order A Sample

Deciding on the perfect roof can be overwhelming. So, instead of wondering what color or style will work, order a sample and take the guesswork out of your decision. It's just another way Boral Roofing makes it easy to buy with confidence.

## Architectural Tools

Our complete suite of architectural tools, including Arcat 3-Part Specs and CAD/BIM drawings, are available for download directly from our website.

## Online Ordering

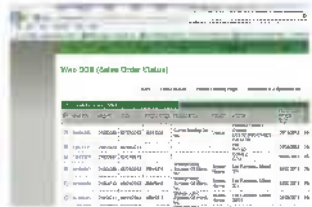

Manage your orders through My Boral, a simple online tool to track product orders in real time, all from the convenience of your computer, tablet or smartphone. Sign-up for e-mail alerts to notify you of your order status.

## Limited Lifetime Warranty

As a brand you can trust, Boral Roofing offers one of the most comprehensive, fully transferable roofing warranties available on the market today.

## Follow Us On Social Media

See what everyone loves about Boral Roofing and get inspired on: Facebook, Twitter, LinkedIn, YouTube, Houzz, Pinterest, Instagram.

**Code Approval:** Complies with all building codes including but not limited to ICC ESR-1647. Some approvals are regional and only apply to locally produced products; please contact Boral Roofing before transporting product across state lines. Specifically, products used in the Miami Dade County region of Florida require special testing and recognition. All tiles are Class A fire rated.

**Disclaimer:** The printed colors shown in this brochure may vary from actual available tile colors. Before making a final selection, be sure to review actual tile samples and roof installations. Please contact your local sales office for further assistance. Inadvertent errors in this publication are subject to change without notice. No performance guarantee is offered or implied beyond that expressly indicated.

Efflorescence is a temporary surface condition which is common to all concrete products. The process is caused by the chemical nature of cement. This reaction can appear as an overall chalky white bloom (a softening of color) or in more concentrated patches. It is difficult to predict how long the effects of efflorescence will last. It depends on the type and amount of deposit as well as local weather conditions. The action of carbon dioxide and rainwater will gradually remove the deposit, in most cases, leaving the original color of the roof intact without further efflorescence occurring. It is superficial and in no way affects the quality or functional properties of the tile.

**Installation:** According to the Tile Roofing Institute loading guidelines, "To achieve a pleasant, random blend of color for your job, care should be taken upon loading to mix the tiles." (Source: 2015 Clay and Concrete Roof Tile Installation Manual). Please consult the Tile Roofing Institute (TRI) Installation guides for application recommendations.

## ABOUT BORAL ROOFING

Boral Roofing LLC is a subsidiary of Boral USA and is the country's largest premium provider of complete roofing and re-roofing solutions for architects as well as commercial and residential builders. Boral Roofing operates manufacturing plants throughout the US.

## ABOUT BORAL NORTH AMERICA

Headquartered in Roswell, Georgia, Boral North America is a leader in key construction materials and building products markets with operations across the USA, Canada and Mexico. In 2017 Boral acquired Headwaters Incorporated, expanding Boral's product offering and manufacturing and distribution footprint across North America. In construction materials, Boral has a national footprint and industry-leading position in the processing and distribution of fly ash – a by-product of coal combustion.

In building products, Boral manufactures and supplies cladding, roof tiles, windows and other light building products for residential and commercial markets nationally. Boral's manufactured stone veneer includes leading brands Cultured Stoner by Boral®, Boral Versetta Stoner, Eldorado Stone, Dutch Quality Stone and StoneCraft. Boral's light building products portfolio includes Boral TruExterior® Siding & Trim – a pioneer of the innovative poly-ash category of exterior building products – as well as shutters, gable vents, mounting blocks and tool systems. In roofing, Boral is a leading manufacturer of clay and concrete roof tiles, and also produces composite polymer and stone-coated metal roof tiles.

Boral also has a 50% share of the Meridian Brick joint venture, a leading clay and concrete brick manufacturer which was formed with Forterra Brick in 2016.

#### Fully Tested and Widely Certified Products

- ASTM C-67 Freeze/Thaw Test
- ASTM C-1492
- ASTM E330-97 Standard Test Method for Structural Performance

Profiles

Crown roof tiles produces a wide variety of profiles that meet the demands of todays design requirements. The company offers a range of High, Medium, and Low profile barrel tiles complemented by three types of Windsor Flat roof tiles.

**Sanibel**  
Sanibel roof tiles are known for a high barrel that reflects a traditional style of great elegance. This roof tile adds visual texture to roofs, making it an ideal product for large projects.

**Tuscany**  
Tuscany roof tiles have soft curves representing a classic European style. This is the best-known roof tile in the world and can be adapted to any type of contemporary or traditional architecture.

**Windsor Slate**  
Windsor Slate is a flat roof tile with a smooth surface. This tile was traditionally used in ancient European castles. It provides great texture and gives the appearance of movement on roofs.

**Windsor Shake**  
Windsor Shake is a flat roof tile with a vertical wood grain texture, simulating a wooden shingle. This roof tile has a rustic appearance and gives any project a natural touch.

**Windsor Split Shake**  
Windsor Split Shake is a flat roof tile with a division in the middle that gives the appearance of smaller individual tiles. This tile has a smooth surface on one side and a rough broom swept surface on the other side, which lends to a country feel with a European touch.

Categories

Crown offers four categories of roof tiles that provide an attractive assortment of colors and finishes to complement the exterior color palette and architectural design of any project.

**Standard Color-Thru**  
Roof tiles produced with one or more color tones blended in the process.

**Premium Color-Thru**  
Roof tiles produced with the Standard Color-Thru system using a greater amount of color and/or higher priced color pigments.

**Slurry**  
Application of a color oxide paste, mixed with cement and applied on the roof tile surface following extrusion.

**Custom Blends**  
Group of two or more colors blended naturally in the mixture.

Colors

Color can provide specific properties, including greater or lesser amounts of light to a façade and proportions that can be changed. To help with tile color selection, we developed four color groups.

**W Warm**  
Colors that add warmth to homes and allow for the creation of more protected ambiances.

**L Luminous**  
Colors that provide more light to a home and create cleaner spaces.

**N Natural**  
Colors that by themselves inspire natural tones.

**S Shadows**  
Colors that add elegance and sober tones to homes.

**We are Centrally Located  
With a State-of-the-Art facility  
of Over 40,000-ft<sup>2</sup>**

## The New Standards

Unlike other roof tile producers, Crown has taken steps to listen and to address the industry's needs.

### The SureFit System

- No shadow lines on the butt ends
- Underside guide beam helps align tiles
- Clean fit and good nail/screw penetration
- Small space between the tile and roof deck, less adhesive-base applications
- Batten lugs positioned to ensure solid mechanical penetration

### The TitePack System

- Factory banded tile five/six-packs eliminate costly and time consuming securing of tile on the job site
- Most stable and safest palletized package in the industry
- Banded system designed to reduce breakage
- Precise packaging enables consistent roof loading and tile counts

### The FastLoad System

- Expedited truck loading
- HD inbound/outbound photo images
- Tube vacuum system to expedite paperwork and reduce wait time for drivers
- Real time e-mail communication to dispatchers
- DOT certified truck scales allow us to keep loads within legal weight limits

### The EasySample System

- Sample shipping system with tracking process to ensure control of samples
- Slice boxes that can carry six slices of tile colors
- Boxes for full tile shipping of up to 3 pieces
- On-Line sample request form available
- Product/Job Location database to track specific products purchased from us

### The SmartBlend System

- We offer consistent factory blended products that eliminate the need to blend tiles on the roof during installation while preventing the potential appearance of "Hot Spots".
- Significant savings of up to \$3.00 per square can be achieved while obtaining a better finished roof for your project.
- Loading and installation times will be reduced resulting in improved efficiencies for our customers.
- Our SmartBlend System will provide consistency of blends and colors that is so difficult to achieve in large projects.

33% Manatee ASASC010  
34% Silverado ASASC012

# Crown Boosted Caps

Our Crown Boosted Caps are used to create a rustic look when using them as an accessory. When installed they provide the unique beauty of an old-authentic clay roof where concrete mortar was used to install and boost the roof tiles.

Our Boosted Caps are available for any color of our Sanibel profile and are installed using a clip and a mortar base of your color choice. You just need to select the color of the boost, the percentage of boost that you want to use, and the color of the mortar base. We recommend using our Crown Oxide to obtain the perfect color match.

| Additional* |        |             |
|-------------|--------|-------------|
| % Boost     | Pieces | Lbs /Square |
| 10%         | 9      | 65 lbs.     |
| 20%         | 18     | 130 lbs.    |
| 30%         | 27     | 195 lbs.    |

*\*The weight per square that would be added to the roof depends on the percentage of boosted caps used.*

### Color Disclaimer

The colors printed in this catalog may vary from actual colors. Before selecting your product, we recommend you see and approve physical samples of the roof tile. In spite of our strict quality control there can be slight variations in tone. When these variations are distributed over the entire roof they contribute considerably to the unique beauty of each project. To prevent patterning we recommend taking roof tiles randomly from different pallets and blending them throughout the roof area.

The colors printed in this catalog may vary from actual roof tile colors.

# Product Specifications

Crown offers roof tiles, standard trim, and roof components to provide a complete roofing system.

At Crown we think of our products not only as a dynamic protection system for your home, we also see them as a key design element that reflects your unique lifestyle. By offering the highest quality roof tiles in the market and combining them with top grade accessories, and a proper installation from a Qualified Installer you can achieve the highest functionality and best appearance for your home while enjoying the benefits of a Complete Roofing System. This is why you will not find a better product to transform your house into your families' unique and exclusive home.

## Roof Components

At Crown we offer components needed for proper roof tile installation, which together with our roof tiles and standard trim produce a Complete Roofing System which will provide a Water-Tight Solution that can withstand Snow, Rain, Heat, and High Winds when properly installed.

For information or questions regarding installation of our roof tiles, standard trim, and roof components we recommend you check the Tile Roofing Institute (TRI) Installation Manual at [www.tilerroofing.org](http://www.tilerroofing.org)

| Red Flint      | COP003 |
| Thunderstorm   | COP003 |

\*To be mixed with white cement

**Crown Sealer** is a premium quality, water based acrylic-latex emulsion designed to seal, protect, and enhance concrete roof tiles. The fully cured film dries to an attractive satin sheen finish that prevents efflorescence, mildew, and algae. **Crown Sealer** is also suitable for many other properly prepared surfaces. Contact Crown Roof Tiles for specific uses and recommendations.

## Features and Benefits

When applied to concrete forms a more waterproof substrate. It will not wear away like watered down sealers.

Will help to stop efflorescence and maintain the original color of your roof tile.

Will protect your roof tiles from UV rays while sealing the pores.

Will help to retard the growth of mold and mildew forming on the roof tile.

Will reduce the frequency between each maintenance.

Reduces alkali bleeding and leaching when applied to new point up work.

Same Sealer used in our manufacturing Process.

## Easy Form Plus®

**Easy Form Plus®** is a lightweight, environment friendly universal flashing that can be used for the sealing of almost any part of the roof. The material is flexible up to 30% due to its creped paintable aluminum surface composite. It comes with an extra metal grid that molds easily to the contours of the roof and walls and is particularly effective on corners. The butyl underside makes it very durable and it does not suffer from wind uplift.

## Dimensions

**MC037:** 12 in. (300mm) x 33 ft. (10m)  
**MC038:** 24 in. (600mm) x 16.5 ft. (5m)

1. Paintable creped aluminium composite
2. Metal grid
3. Butylon backing
4. Release paper - divided in two strips

Highly durable UV resistant metallic surface gives similar expected lifespan to lead and zinc.

Self-fixing to itself or onto dry, dust-free surfaces via an all across adhesive butyl lamination.

The fully adhered butyl underside makes it very durable and does not suffer from wind uplift.

Split Release paper allows for easy and precise installation.

Universal - flexible material suitable for all clay/concrete tiles and flat slate products.

Easy to form even in complex surfaces and can stretch up to 30% in dimensions.

Easier to form, lighter, and less expensive than lead.

Highly resistant to UV Rays, high temperatures, rain, snow, dust, and to constant exposure to the elements.

Environment friendly, safe lead-free product.

## Disclaimer

After constant exposure to environmental elements, the color of the roof tiles can change over time and may appear lighter compared to its original installation date. This happens by the effects of weathering and accumulation of dust and debris in the roof area. This effect can happen to any other concrete products that are exposed to the environment.

A temporary light patterning may appear on the tiles due to a condition common to all concrete products identified as Efflorescence. This is caused by a chemical reaction of the concrete that brings alkali deposits to the surface of the tile. Although we treat all our products to minimize this occurrence, the presence and duration of the effect will depend on local weather and environmental conditions. This temporary occurrence does not affect the integrity of the tile.

Our slurry covered tiles are not recommended for use in areas where Freeze-Thaw Cycles may be present.

The specifications contained in this catalog do not constitute in any way a warranty of our tiles. The only valid warranty is the "Crown Limited Lifetime Product Warranty" that is found on our website or on our Crown Warranty printout. Crown only warrants the quality of our products. Services and installation provided or manufactured by others are not included.

Product availability may change without notice.
