

Pine Ridge Garden Club

Meeting Reminder — Wednesday, October 21, 2026

Join us for another enjoyable and informative Pine Ridge Garden Club meeting!

Guest Speaker: Brennan Doak

Brennan will present “*Wings, Scales, and Paws: Garden Helpers of Central Florida.*” Discover some of the fascinating creatures that share our yards and learn more about the important roles they play in our gardens.

Did You Know? — Ellen McNally

Ellen will introduce us to the native wildflower **Betony**, also known as Rattlesnake Weed, and share interesting facts about this unique Florida plant.

Plants, Seeds, and Gardening Resources to Share

As always, the Garden Club and its members will have free gardening literature, plants, and seeds available. If you bring plants or seeds to share, please label them and place them in plastic bags to help keep our Community Center clean.

Please check the Invasive Plant Species List <https://www.floridainvasives.org/plant-list/2023-invasive-plant-species/> before bringing any plants or seeds to share. Plants or seeds listed as invasive are not permitted. Plants intended exclusively for indoor or patio use may be exempt, but please label them “**House Plants Only.**”

Help Us Recycle!

Do you have small plastic nursery pots you no longer need? Please bring your clean, reusable pots (one gallon or smaller) to our meetings. Your donations help our members continue sharing plants with one another!

Meeting Details

📍 Pine Ridge Community Center

🕒 Doors open at 5:30 PM

🕒 Program begins at 6:00 PM

We look forward to seeing you there for an evening of gardening, learning, and fellowship!
